Articles of the Calendar

—AND—

Astronomical Notices for the Year 1899

ON the left hand page of each month are given the rising and setting of the Sun, and the length of the day, also the data required for Solar observations, namely,—the Equation of Time (that is the difference between variable Sun Time and uniform Clock Time, to be added or subtracted according as one is behind or ahead of the other), also the Sun's Declination, at the instant of Mean Noon, Greenwich Time, and the Sun's apparent semi-diameter to the nearest tenth of a second. With these exceptions all the calculations are reduced to the nearest minute of Local Mean Time at Charlottetown,—Latitude $46^{\circ} 13' 55''$ N., Longitude $63^{\circ} 7' 33''$ W.); giving 4h. 12m. 29.5sec. difference slow on Greenwich time.

The Meridian Altitude of the Sun (or Moon) for any day of the year by applying the Declination to the co-Latitude of the place, adding the Declination if North, subtracting if South.

For example,—To find the Mer. Alt. of the Sun at Charlottetown on the longest and shortest day of the year:

Latitude of Charlottetown	90 00 00
	46 13 55
Co-Latitude	43 46 5
Sun's Declination June 21, N. Dec. 21, S.	23 27 13
	67 13 18
	20 18 52
	Mer. Alt. June 21st
	" " Dec. 21st

From the Sun's apparent semi-diameter, the Sun's Horizontal Parallax (that is the Sun's apparent semi-diameter as seen from the Sun's distance) may be found dividing by 107.44 the proportion the Sun's actual diameter bears to that of the Earth. Thus we find for July, when the Sun's distance is greatest, $15' 45'' \div 3 = 9'.45.3 = 8''.791$. Also, on Dec. 31, when the sun is nearest the Semi-diameter $16' 17''.5$ gives $9''.077$ for Parallax.

On the right hand page for each month are given the Phases of the Moon, with its Rising, Southing and Setting, with the time of High Water at Charlottetown, to the nearest full minute of local mean time.

To assist in weather forecasts are added the Moon's Perigee and Apogee, the time of crossing the Equator and of reaching its greatest North and South Declination, these periods being found to be accompanied by atmospheric changes, more or less marked as they agree with the Moon's changes and Perigee. When two or more of these influences concur within the space of 48 hours, it is indicated by ** or *** accordingly.

ECLIPSES.

During the year 1899 there will be three Eclipses of the Sun and two of the Moon.

(I.) A Partial Eclipse of the Sun January 11, 1899, mean time of conjunction 11h. 9m. 0.4sec. The central line of the Moon's shadow passes from the east of China, Corea, Japan to Alaska.

(II.) A Partial Eclipse, June 7th, visible from Spain, across Europe, Russia, Asia, Greenland and Siberia.

(III.) An Annular Eclipse of the Sun, December 2, only partially visible at the south-west portion of Australia and Van-dieman's Land. The central line, or the Moon's shadow passes the Antarctic Pole.

JUNE 22.—Total Eclipse of the Moon, G. M. T., opposition R. A., 2h. 20m. 28.8sec.; R. A. 18h. 8m. 4.18sec.

REMARKS.—The nearer the Moon's changes to midnight the fairer the weather will be during the next seven days; the nearer to mid-day, the rougher and more stormy. The former time occupies from 10 p. m. to 2 a. m., the latter from 10 a. m. to 2 p. m.

2. The phases happening from 4 to 10 p. m., may be followed by fair weather, but this chiefly depends upon the direction of the wind.
3. If a storm arises from the east on or immediately preceding the Spring Equinox, or a week after, the following Spring or Summer will be wet four times out of five; if from the West, North or South-west the Spring and Summer will be dry five times out of six.

ASHBY HANNIBAL, 7095

Was foaled September 15, 1885, stands 16 hands high and weighs 1235 pounds. Was bred by George R. Goldsborough, Easton, Maryland.

Ashby Hannibal is a horse of great style and beauty, and is considered by the best horsemen to be the best shaped carriage Stallion ever imported to this island. He is proving himself a sure foal getter, and his fillies have won first prizes at our Exhibitions for the last two years, and in Georgetown last year his colts won first prize. This horse is getting the kind of stock the people are looking for, which is good stylish drivers with plenty of bone.

Farmers who intend breeding this season should call and inspect him for themselves, and you will be convinced that you cannot do better than breed to this horse if you want to improve your stock with a good carriage horse, for this is the kind that sells for big money. Ashby Hannibal is siring that class of stock.

The Charlottetown Business College gives a true and practical course in all subjects relating to mercantile transactions.

The students act as Buyers and Sellers, Traders, Book-keepers and Accountants in actual business operations, and the currency issued by the College Bank, and the merchandise issued from the Emporium, are used in *bona fide* business transactions, just the same as in real mercantile and banking houses.

The C. B. C.'s Get There!

The Charlottetown Business College and Writing Academy re-opens for the fall and winter term on August 15th next. The college opens earlier than usual this year to enable a number who intend going away, to take a course. Judging by the number of applications shown us by Principal Miller, the attendance this year will be far in excess of any previous term. The fact that not a graduate of the past term has failed to secure employment speaks volumes for the work done at the C. B. C. The teaching staff is not only large and capable but the student's interests are well looked after,—after graduation as well as during the term. That the C. B. C.'s get there is a true saying—none can deny.—*Patriot*.
